Aaron Berk
McGill University, Dept Math & Stats
805 Sherbrooke Street West
Montreal, QC, Canada H3A 0B9

Education

University of British Columbia

Ph.D. Applied Mathematics

Vancouver, BC
Sep 2015 – Aug 2021

- On LASSO parameter sensitivity
- Principal Supervisors: Dr. Özgür Yilmaz and Dr. Yaniv Plan
- Also supervised by Dr. Ipek Oruc
- Awarded Four-Year Fellowship (institutional)
- Awarded NSERC CGS-D (national)
- Member of IAM Student Committee and Mathematics Grad Student Committee

University of Toronto

M.Sc. Mathematics

Toronto, ON
Sep 2013 – Aug 2014

- On multiscale analysis and PDE methods on graphs in image processing
- Supervisor: Dr. Adrian Nachman
- 90% cumulative average
- Math rep to UT Graduate Students Union

McMaster University

B.Sc. Hon. Maths & Stats

Hamilton, ON
Sep 2009 – Aug 2013

- Dean's Honours List (2009 - 2013)
- The McMaster Honour Award, Level 3 (2009)
- The University (Senate) Scholarship (2010, 2012)
- NSERC USRA (2012, 2013)
- 11.5 cumulative average (3.95 GPA)

Selected Research Experience

Postdoctoral Fellow — McGill University

Drs. Simone Brugiapaglia (Concordia) & Tim Hoheisel (McGill)

May 2022 –
Montréal, QC

- Realistic sampling strategies for deep generative inverse problems in medical imaging

Postdoctoral Fellow — Concordia University

Drs. Simone Brugiapaglia (Concordia) & Tim Hoheisel (McGill)

Sept 2021 – Apr 2022
Montréal, QC

- Realistic sampling strategies for deep generative inverse problems in medical imaging

Intern — Learning for Inverse Problems & Dynamical Systems

Mitsubishi Electric Research Laboratories

May – Sept 2021
Boston, MA, USA

Graduate Researcher — Compressed Sensing & Machine Learning

Drs. Özgür Yilmaz, Yaniv Plan & Ipek Oruc, UBC

Sept 2015 – Aug 2021
Vancouver, BC

- Researching convex methods for compression and recovery of structured high-dimensional data using geometric functional analysis and high-dimensional probability.
- Researching deep learning methods for medical imaging with applications to ophthalmology and the automated investigation of patient health.
- Experienced user of PyTorch for training deep neural networks.

Data Scientist — Feature Selection & Signal Processing

Andrea Palmer, Paul Fijal

Oct 2016 – Feb 2017
Awake Labs, Vancouver, BC

- Mitacs Accelerate internship: affective computing R&D for quality of life improvement in children on the autism spectrum.
- Researched optimization & feature selection methods for structured time series analysis.

- Graduate Researcher** — Medical Imaging Algorithms May – Aug 2014
Supervisor: Dr. Adrian Nachman, University of Toronto Toronto, ON
- Researched variational methods in image processing to develop fast computational methods with applications to medical imaging.
 - Relied heavily on wavelet methods, numerical methods for PDE (gradient descent, spectral methods, convex splitting), eigenvalue problems (the Nyström Extension), matrix conditioning.
- Undergraduate Research Assistant** — Computational Fluid Dynamics May – Aug 2013
Supervisor: Dr. Nicholas Kevlahan, McMaster University Hamilton, ON
- Researched adaptive wavelet methods for solving PDEs on irregular and spherical domains; examined efficacy of these methods in solving shallow water equations subject to realistic bottom bathymetry and coastline data.
 - Wrote a software library in MATLAB to process and visualize geophysical images and data, using level set methods to morphologically alter real data according to its geometric properties.
- Undergraduate Research Assistant** — Computational Stats, Math Ecology May – Aug 2012
Supervisor: Dr. Benjamin Bolker, McMaster University Hamilton, ON
- Optimized and analyzed GLM models for heteroskedastic pine seed and pine seedling spatial population distributions (using `nlme`, `stats`, and `RandomFields` in R).
 - Created protocols in R to retrieve, analyze and visualize large-scale bibliometric data.
- Summer Research Assistant** — Computational Mathematical Biology May – Aug 2011
Supervisor: Dr. Diamandis, SLRI, Mt. Sinai Hospital Toronto, ON
- Developed and simulated a mathematical model to simulate the effect of chemotactic enzyme gradients on tumour morphology and tumour cell movement (using R) (Karagiannis, *et al.*, 2013)
 - Assisted lab members with data processing and statistical analysis using Microsoft Excel and R

Selected Research Talks

- Scientific Machine Learning** CMS S22 Meeting
“On Lipschitzness of solution mappings for LASSO” June 2022
- Invited research talk on variational analytic tools for analyzing LASSO solution sensitivity.
- Mathematical Foundations of Scientific Machine Learning** AARMS CRG 2022
“Towards generative compressed sensing via random sampling in bounded orthonormal systems” June 2022
- Contributed research talk on generative compressed sensing with subsampled isometries.
- Mathematical Foundations of Machine Learning** CMS W21 Meeting
“Sensitivity to parameter selection for LASSO programs” Dec 2021
- Invited research talk on probabilistic tools for analyzing LASSO parameter sensitivity.
- CRM Applied Math Lab seminar**
“Parameter sensitivity in ℓ_1 minimization” Oct 2021
- Invited research talk on probabilistic tools for analyzing LASSO parameter sensitivity.
- The Mathematics of Sparse Recovery and Machine Learning** CAIMS-SIAM AN20
“Parameter sensitivity in ℓ_1 minimization” Jul 2020
- Invited research talk on probabilistic tools for analyzing LASSO parameter sensitivity.
- Virtual Vision Sciences Society 2020** Vision Sciences Society
“Learning from few examples: Classifying sex from retinal images” Jun 2020
- Accepted research poster on deep learning performance for ophthalmology applications.
 - doi:10.1167/jov.20.11.255
- PIMS CRG Summer School** Simon Fraser University
PIMS CRG Summer School: Deep Learning for Computational Mathematics Jul 2019
- Invited research talk on deep learning applications to medical imaging in ophthalmology.
- SampTA 2019** Université Bordeaux
13th International Conference on Sampling Theory and Applications Jul 2019
- Accepted research talk on sensitivity of ℓ_1 minimization to parameter choice.
- UBC Department of Ophthalmology & Visual Sciences** VGH/UBC Eye Care Centre
35th Annual O&VS Research Day April 2019
- Research talk on a deep learning approach to understanding retinal fundus images.
 - Winner of Graduate Student Presentation Award.
- PIMS Mathematical Education Circles** University of British Columbia
“The mathematics of juggling” March 2019
- Talk on the “lighter side of mathematics”.
 - Introduced high school teachers, teaching faculty and research faculty to the mathematics underlying juggling.
 - Facilitated a mini-workshop in which participants learned to juggle in “ten minutes or less”.
- SFU Computational Math Seminar** Simon Fraser University
“Program selection for sparse proximal denoising” March 2019
- Invited research talk on parameter instability in sparse proximal denoising programs.
- Banff International Research Station** Banff International Research Station
Intersection of Information Theory and Signal Processing October 2018
- Invited research talk on parameter instability in proximal denoising programs.
- PIMS High Dimensional Data Analysis** University of British Columbia
Mathematical Foundations of Data Science August 2018

- Invited research talk on parameter instability in compressed sensing programs.

International Matheon Conference
Compressed Sensing and its Applications

Technische Universität Berlin
 December 2017

- Contributed research poster on sensitivity in sparse proximal denoising programs.

Selected Honours & Awards

IVADO Postdoctoral Fellowship Institut de valorisation des données (Montréal, QC)	\$60 000 <i>p.a.</i> <i>May 2022</i>
CRM Applied Math Lab Postdoctoral Fellowship Centre de recherches mathématiques (Montréal, QC)	\$50 000 <i>p.a.</i> <i>Sept 2021</i>
British Columbia Graduate Scholarship Province of BC, UBC	\$15 000 <i>Jan 2021</i>
MDS TA Award UBC Master's of Data Science	\$100 <i>Jun 2020</i>
Margaret L. Adamson Award UBC Ophthalmology and Visual Sciences	\$2 000 <i>Dec 2019</i>
Acclerate internship Mitacs, Awake Labs	\$15 000 <i>Oct 2016</i>
Canada Graduate Scholarship—Doctoral (CGS-D) NSERC, UBC	\$35 000 <i>p.a.</i> <i>Sept 2016</i>
Four Year Fellowship University of British Columbia	\$18 000 <i>p.a.</i> <i>Spring 2015</i>
Canada Graduate Scholarship (Master's level) NSERC, University of Toronto	\$17 500 [<i>declined</i>] <i>Fall 2014</i>
Blythe Fellowship University of Toronto	\$16 500 <i>Fall 2013</i>
Ontario Graduate Scholarship McMaster University	\$15 000 [<i>declined</i>] <i>Spring 2013</i>
NSERC Undergraduate Student Research Award McMaster University	\$6 500 <i>Summer 2012, 2013</i>
Samuel Lunenfeld Research Award Mt. Sinai Hospital, Toronto, ON	\$6 500 <i>Summer 2011</i>

Facilitation & Teaching Experience

Sessional Instructor <i>MATH 315 Ordinary Differential Equations</i>	Dept Math & Stats, McGill, Montréal QC <i>Sep 2022 – Dec 2022</i>
<ul style="list-style-type: none"> • Lecturer for Ordinary Differential Equations • Created lecture material, weekly assignments, midterms and exam; focuses on: separable and linear equations, higher-order systems, series solutions, in/homogeneous systems, Laplace transforms. 	
Sessional Instructor <i>MATH 387 Honours Numerical Analysis</i>	Dept Math & Stats, McGill, Montréal QC <i>Jan 2022 – Apr 2022</i>
<ul style="list-style-type: none"> • Lecturer for Honours Numerical Analysis • Created lecture material, weekly assignments, midterms and exam; focuses on: iterative methods, interpolation, approximation methods, numerical integration and differentiation. 	

Sessional Instructor

Dept Statistics, UBC, Vancouver BC

*UBC Masters of Data Science program**Sep 2020 – October 2020*

- Lecture and lab instructor for the 1-block course [DSCI 551: Probability & Descriptive Statistics](#)
- Created weekly lab assignments, bi-weekly quizzes and twice-weekly lectures, with focuses on: dependence, simulation, and conditional probability, contextualized for professional data science.

TA Trainer & Facilitator

Dept Mathematics, UBC, Vancouver BC

*UBC Mathematics TA Training**Sep 2018, 2019, 2020*

- Developed, led content delivery for and facilitated small-group activities for new graduate student TAs in the Department, focusing on Facilitative Teaching, Marking, online coursewares, Expectations, Communication, and Diversity.
- Developed a web-based Canvas module on Expectations & Diversity, as these topics pertain to being a Canada-based teaching assistant, mathematician and academic in the international academe.

Mathematics Host

Science World, Vancouver BC

*Future Science Leaders**Jan 2019 & Jan 2020*

- Outreach program for engaged, highly motivated high school students interested in STEM fields.
- Led content delivery and facilitated small-group activities.
- Developed modules for self-guided learning for cryptography with Python.

Workshop Organizer and TA

PIMS, UBC IAM

*BC Data Science Workshop**Jan – Jun 2017, 2018*

- Served as co-organizer for the [2017](#) and [2018](#) BC Data Science Workshop.
- Coordinated with industry mentors to develop projects of suitable scope.
- Mentored student teams through facilitation of research ideas and background knowledge.
- Designed and led 2017 [mini-project sessions](#).

Participant

UBC Dept. Mathematics

*Instructional Skills Workshop**May 2016*

- Three day intensive workshop developing effective teaching and facilitation practices, with a focus on teaching and learning in a mathematics settings.

Teaching Assistant Experience

Master of Data Science program

University of British Columbia

*Teaching Assistant**Sept 2017 – May 2020*

- UBC's professional Master of Data Science program is a year-long intensive, cut into 6 blocks of courses and a capstone project.
- Facilitated course labs. Hosted office hours and problem solving sessions. Developed detailed assignment solutions. Marked and provided detailed feedback for students' assignment submissions. Provided feedback and review of draft assignments before they were released to students.
- Detailed course descriptions [available here](#). A list of courses for which I've served as TA are included below.
- 2017: Descriptive Statistics and Probability for Data Science, Communication and Argumentation, Data Wrangling, Supervised Learning I, Feature and Model Selection, Statistical Inference and Computation II, Experimentation and Causal Inference
- 2018: Communication & Argumentation, Data Wrangling, Databases and Data Retrieval, Unsupervised Learning, Spatial & Temporal Models, Web and Cloud Computing
- 2019: Descriptive Statistics and Probability for Data Science, Statistical Inference and Computation I, Supervised Learning I, Supervised Learning II, Spatial and Temporal Models, Advanced Machine Learning
- 2020: Supervised Learning II, Unsupervised Learning, Advanced Machine Learning

Master of Data Science program

University of British Columbia

*Courseware developer**Summer 2020*

- Developed and adapted all lecture and lab learning resources for Supervised Learning II and Advanced Machine Learning from [Tensorflow](#) to [PyTorch](#).

Multivariable and Vector Calculus

University of British Columbia

Teaching Assistant

Jan 2015 – Apr 2015

- Second year calculus for electrical engineers; co-syllabus with the electrical engineering electrodynamics course.
- Graded students' midterms and biweekly assignments; required knowledge of electrodynamics, multivariable calculus, linear algebra.

Math Learning Centre

University of British Columbia

Teaching Assistant

Sep 2015 – Dec 2016

- Served in several roles for a drop-in help centre run by the Math Department.
- “Quick-help TA”: given a strict two minute duration in which to respond to student questions. Peak hours popularity demand high energy, on-the-spot ingenuity, concise clarity
- “TA in-charge”: ensure TAs evenly distribute among students; collect regular data on number of students, TAs; help students when other TAs are indisposed.
- “TA”: create novel explanations for class-learned concepts to address student questions.

Biology, Models and Mathematics

University of Toronto

Teaching Assistant

Sept 2013– Apr 2014

- First year math course for Biology students, requiring instruction to be delivered in a way that is relevant and appropriate for Biology students.
- Graded students' weekly assignments and provided feedback to students' instructor.
- Held two weekly hour-long office hours that were well-attended.

Engineering Mathematics IV

McMaster University

Undergraduate Teaching Assistant

Jan – Apr 2013

Jul – Aug 2012

- Second-year second-term Engineering Mathematics course covering vector calculus, Fourier series, linear algebra, graphical visualization and MATLAB.
- Graded students' midterms, weekly lab assignments.
- Led two twice-weekly labs to review course content using slides I created in L^AT_EX
- Responded to students' questions via e-mail and during office hours.

Calculus for Math and Stats I

McMaster University

Undergraduate Teaching Assistant

Sept – Dec 2012

- Designed and conducted weekly one-hour tutorial; supervised in-tutorial quizzes.
- Prepared creative, rigorous examples to stimulate students' interest, develop intuition and mathematical insight.
- Answered students questions via e-mail and in the Math Help Centre.

Undergraduate mathematics

Ontario, Canada

Private Tutor

Jan 2012 – Aug 2014

- Tutor for calculus, statistics, differential equations, computer science, complex analysis
- Create study curriculum tailored to student's needs
- Experience with language barriers, mature students, students with disabilities and destination-not-the-journey type students

Other Outreach & Service

Tutor

UBC First Nations House of Learning

UBC Longhouse drop-in tutoring

Sept 2020 – May 2021

- Drop-in tutoring sessions for (typically first-year) indigenous students at UBC.
- Primary focus on calculus, word problems and problem solving skills.

Convener

UBC IAM, UBC DSI, PIMS, CANSSI

BC Data Colloquium

Jan 2017 – Aug 2018

- Organized speakers for a monthly colloquium.
- Talk descriptions available at bcdata.ca.

CMS Student Committee (STUDC)

Canadian Mathematical Society

Co-Chair, Student Director

Jun 2015 – Jun 2018

- Coordinated and directed operations of the (national scale) CMS student committee and its members.
- Managed the largest budget of any CMS committee.
- Served as representative of Canadian math students and as liaison with CMS leadership.
- Reviewed student conference funding proposals, and awarded student prizes for academic achievement in the form of poster printing subsidies and conference bursaries.
